DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Fujita (JP 2000-310993).

As to claim 8, Fujita teaches a method of voice activity detection by analyzing the energy of an input signal, comprising the steps of:

Defining a first threshold (THD1); and a second threshold (THD2), where THD1 is slightly higher than THD2;

Repeatedly comparing a power of an input signal representing a predetermined interval $P(t)$, with the first and second threshold while accumulating the result for a predetermined period into a memory (Fig.8; pg.5, par.37-pg.6, par.44, par.52-53)

Allowable Subject Matter

Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claims are allowable, because, Fujita alone or in combination with the prior arts of record failed to teach comparing the sum to a third threshold for determining voice activity as recited in the claims.

Claims 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 9-10 are allowable, because Fujita doesn't teach weighting the numbers prior to summing them as recited in the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Garner et al. (6,427,134).
